DETAILED ACTION

Claim Rejections - 35 USC § 101

Claims 16-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Independent claim 1, is directed to a processor configured to “trade in” an immunizing instrument and to “trade in” a qualifying instrument. As claimed there is no concrete and tangible result of said system. The claim can be cured by amending the “trade in” to “execute a trade”.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 16-25 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a determining a first delta sensitivity, does not reasonably provide enablement for executing a trade in an immunizing instrument for other (e.g., 2nd order) sensitivities. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.
